Welcome to our 2022 Community Supported Agriculture (CSA) program!

We are excited about meeting the challenge of feeding local families again this year, our 16th year filling shares! By purchasing a farm share, you receive a weekly "share" of the harvest of vegetables and fruits (when in season). We harvest for shares daily, picked at the peak of nutritional content, flavor and ripeness. We grow our vegetables and fruits with many old-time heirloom and organic seeds, and using organic methods - no chemical fertilizers, genetically modified seeds (GMOs) or sprays harmful to bees or the environment. Our growing methods encourage a healthy and diverse population of beneficial insects and pollinators. By purchasing a farm share, you provide our farm with funds for purchasing seeds, potting soil, and other materials or equipment to start the growing season. Be secure in knowing where your food comes from, protect your family from rising food prices, support local farmers, and serve your family the most delicious and nutritious vegetables and fruits by investing in a farm share today.

Our share sizes:

Full shares are geared toward a larger family or those who love preparing vegetarian dishes, and eat home most often.

Half shares are geared toward a couple who loves veggies, a small family who eats out occasionally during the week, or a larger family who gardens and wants to supplement their harvest.

Mini shares are geared towards single folks or a couple who eats out often. It will contain 3-5 items if we've overwhelmed you with too many veggies in the past!
