Stonyledge Farm's little piggies are ready to go to market and we will have pork shares available! Be protected from rising food prices, support a local farmer and serve the tastiest pork to your family by buying a share today. For Easter or special family dinners, our bone-in, no-nitrate hams will be the focal point. Our free-range pork is grown in a large woodland pen and fed an assortment of veggies (those tired-looking winter squash & root cellar veggies!), hay, and grain without growth hormones or antibiotics. The sunshine, exercise, good diet and happy life create flavorful and tender pork. Our pork shares will be made available in two sizes: a 35 lb. half-share and a 75 lb., "family-sized" full share. Please see the next page for an idea of what each of the shares will contain.

Our pigs will be processed at a USDA inspected facility in RI – just a 45-minute ride away. This facility is the same one used by "certified humane" growers and is respectful in its treatment of our animals. The carcasses will be cut up and packaged at Westerly Packing, a USDA inspected facility in Westerly that also makes terrific sausage. The meat market we use to smoke our bacons and hams is USDA inspected and uses NO nitrates in their processing and uses apple wood for the smoking. They do a wonderful job for us!

Please be mindful that the weights of the individual packages will vary and the pounds for each cut of pork are an approximation. We will try our hardest to create pork shares as close to the estimates as possible.
